

# Vinson Valega “Consilience” Essay

~~~~~

## Communication

*Consilience Productions* is an attempt to extend the dialogue found between musician and listener into the realm of our everyday lives. Just as the creative music on this CD is essentially a form of communication between disparate ideas, we, as neighbors to one another, must creatively navigate through seemingly disconnected points of view in order to better understand the issues of our times.

Acting as a platform upon which discussion can take place, *Consilience Productions* wants to connect topics that might seem mutually exclusive at first, but are, in fact, associated in one way or another. Through desire, effort, creativity, and time, we can communicate a new language of respect, care, and love towards each other and the world around us.

We invite you to the *Consilience Productions* website to add to this dialogue only just begun with the music on this CD.

Thank you very much for listening to us.  
Now we're looking forward to listening to you!
